

## Government Problem Statement

<b>18.</b>	<b>Problem Statement Title</b>	Design AI-based drones and robotics solutions that can handle medical emergencies, search and rescue operations etc.
	<b>Description</b>	Designing AI-based drones and robotics solutions for medical emergencies and search-and-rescue operations can significantly enhance the effectiveness, speed, and safety of critical response efforts. These technologies have the potential to save lives, reduce human risk, and provide real-time data for better decision-making in emergencies, especially in situations where time is crucial, such as natural disasters, accidents, or terrorist attacks.
	<b>Department</b>	Department of Revenue
	<b>Sector</b>	Disaster Management
